

Preparation of Hand-sanitizers by the Department of Chemistry, Asutosh College

(Dr. Madhusudan Banerjee with team)

Amid serious global health concerns in the face of rapidly increasing spread of COVID-19, the Department of Chemistry, as part of a Community Outreach programme, has taken the initiative to produce hand-sanitizers which are needed to combat the menace posed by the disease.

(The first bottle was presented to Prof. Apurba Ray, Vice-Principal of the college, by Dr. Banerjee)

The hand-sanitizers, with more than 60% alcohol (as per WHO recommendations) are being prepared by students and staff of the department of Chemistry, under the careful supervision of Dr. Madhusudan Banerjee, senior teacher in the department. The first bottle was presented to Prof. Apurba Ray, Vice-Principal of the college, by Dr. Banerjee.

The hand-sanitizers are meant for distribution among students and members of staff, free of cost. The initial batch of 65 bottles has already been distributed among them.

Let us all be a little more responsible and disciplined in maintaining personal hygiene and observing government-issued health guidelines and thus win the battle against the virus.
